

Techrider Twin-Glow

We provide:

Setting:

- It is necessary to build up props before the show, as well as to dismantle props after the show.
- 2 Plexiglas cubes (10 kg each) have to be set up at a distance of 2.7 m.

We need:

Light:

- The room must be completely dark.
- No stage lights are required during the show.

Sound:

- Sound system with 3.5mm stereo jack and cable (positioning: on the left or right side backstage)

Miscellaneous:

- Table (2x1m) for our equipment with 3.5mm stereo jack and cable and 240V power supply
- Stage size: min. length 5m, with 4m, height 4m
- wardrobe
- 4 m high room to warm up before the show, if possible
- Sound engineering briefing + rehearsal on stage (30 minutes at least)

Please do not hesitate to contact us for any further questions. We are looking forward to a successful cooperation.
